

Science Of Pyramid

Since ancient times, and even today, in all the Countries of the whole World, there have been, and are Persons who could, and can, treat ordinary Water by Chants, Mantras or Otherwise so as to enable such Water to perform some Miracles such as Instantaneous Remissions or Miraculous Cures of several kinds of Ailments.

Even when this Phenomena has been occurring several times everyday since ancient times, no systematic, major study seems to have been done. Also, in spite of several major attempts, so far Science has not been able to understand as to how this is happening.

We should undertake a major, all comprehensive study of this Phenomena and such Waters. Somebody should play a small role in such a major study, relying a very great extent on several other Research Organizations (and Individuals too) for various kinds of tests and experiments.

The small role (above mentioned) one can undertake :

- (i) Collection of such water from various sources and supply properly packed samples to other participating Organizations.*
- (ii) Maintenance of Systematic Records of the Sources, the*
- (iii) ir Methods and the Results of the tests and experiments of the participating Organizations.*
- (iv) Examination and Evaluation of such Waters by Kirlian Photography.*
- (v) Periodic Publications of the Studies of the results of the above three efforts; lastly.....*
- (vi) Regular production of one kind of Water; the ultimate aim being to produce such Water which can kill Pathogenic Organisms and/ or Cancer and yet, side by side, can promote healthy growth of Non—Pathogenic Organisms and/or Normal Cells.*

To seek regular active co-operation of several other Organizations and Individuals to undertake the following tests and experiments:

I: Individuals (Household Level):

Individuals can take-up several subjective as well as objective experiments at the Household level. With a small investment they can take-up making of one kind of Water and regularly use it to find out its effects General Health; on small Cuts, Bruises and Burns; on major Ailments such as Aches, Head-aches, Colds, Fevers,

Rheumatic pains, and many other minor Psychosomatic problems; on facial skin as a lotion, Moods, on Thinking Capacity, on Meditative Capacity, etc.

II: Organizations (at Research Level) :

A: Biological Tests:

- (i) Whether or not such Waters are completely free of all Organisms; that is, whether or not they are a sort of Biological-Vacuum ?*
- (ii) Comparative Examinations of the effects of such Waters and respective Control Waters on Germination of seeds in Laboratory Conditions;*
- (iii) Effects on different Cancer-cells and surrounding Normal-Cells;*
- (iv) Effects on Pathogenic and Non-Pathogenic Organisms;*
- (v) Effects on different Viruses.*

B: Chemical Tests:

Whether such Waters do give positive results to all Chemical Tests which conclusively prove them to be the Chemical H₂O.

C: Physical Tests:

- (i) Comparative measurements of some Physical Properties of such Waters and the respective Control Water samples; such as Boiling and Freezing Points; Rate of Evaporation; Surface Tension; Viscosity; Adhesion and Cohesion.*
- (ii) Electron Microscopic Measurements of the –*
 - (a) Apex-Angle of such Water Molecules – the angle made by two “H-Atoms” which is normally 105 ° C;*
 - (b) The distance (in Angstroms) between the “H-Atoms” and “O-Atoms”.*
- (iii) Structural studies of the Polymer-Clusters of such water molecules (Please see the Writ-Up).*

Various organizations and their scientists are requested to take up some of the above mentioned tests and experiments, circulate the copies of the accompanying write up and co-ordinate with each other to contribute their efforts to this research work as Individuals.

A special write-up on “Water” is enclosed here with to stimulate the Interest and Imagination of Scientific Community.

Water

[This write-up is prepared to stimulate the Interest and Imagination of our Scientific Community. It being a property of the MAN, the HOMO SAPIENS, it can be used by any MAN in any manner except to get it copy-written in favour of any one Individual Entity.]

1: Since the dawn of the knowledge and scientificity, Man has been experimenting with water and yet, even today, it is the most mysterious of all chemicals.

Till recently it was believed that its molecular structure was bounded together so strongly that it was more like an indivisible element rather than a Chemical Compound.

But now Science has learnt that the H—O—H Molecular Bonds of Water are very weak and are only 10% of the strength of the most ordinary chemical bonds. So, for Water to exist at all, there must necessarily be lots of other bonds to hold it together ----- bonds of binding forces that are known and that are not yet known to Science. Also that the structure of Water is not static but dynamic and it subject to a variety of influences and can be altered in perspective ways.

Thus, Water is extremely sensitive to several kinds of very delicate influences and is capable of adapting itself to the most varying circumstances to a degree attained by no other liquid ---- extremely delicate influences such as that of even distant Planets and Galaxies and also a that of our Minds.

2: Water molecules are the most uniquely polarized Lop-sided Molecules and so, over normal range of temperatures, it occurs as Polymer (H₂O)_n; Water

molecules are the most sociable creatures (possibly, in the whole universe). They are always in social groups, in societies, called Giant Molecules or Water Gimols. These conglomerations are not crowds, that is, irregularly arranged, randomly collected people, one such group being no different from any other; but they are so intricately laced in regular patterns of so immense a variety that one Researcher went to the extent of saying: “ Every glass of Water is a unique GIANT MOLECULE and we cannot have two that are exactly similar.”

So, Science is about to tell us that a glass of Water touched by one will have Water-Gimols of a different pattern than the one touched by some one else; and pretty soon Science will tell us that glass Water touched by one and the same person with different intentions (state of mind) will have Water Gimols of different patterns. Individual Water Molecules are sensitive to so extremely delicate forces that the different fields generated around our hands by our different intentions, will be strong enough to create Water Gimols of different patterns; and it is visualized that the strength of our FAITH, the Super Powerful Entity known to us since Ancient Times.

It is because of this that the Phenomena of the Green and Brown Thumb effects on Vegetation, observed since Ancient Times, is occurring through spontaneous changes in Water structure and Conglomeration Patterns, in Gimol Patterns.

3: So, also, Science has learnt that Water is particularly very unstable between 35°C- 45°C , the Body Temperatures of most of the Active Animals; that is, Water at these temperatures is Super Sensitive and hence still more weaker fields and influences are able to bring about still more greater changes in Water.

Our Body is about 70% Water and our Brain is more than 80% Water and these Waters are at a temperature when Water is Super Sensitive; and so, extremely weak influences will be able to bring more intricate and complex changes in our Water Chemistry, which, in fact, is our Life Chemistry.

Science already knows that millions of different chemical compounds together form our Physical Bodies; and that all these chemicals keep on getting transformed by way of millions of chemical reactions that are going on all the time ; and that all or most of such reactions are dependent on the structural patterns of the Gimols of the different compounds.

Day by day, Science is getting increasingly convinced that all such millions of Chemical Reactions, which comprise our Life Chemistry, are influenced and controlled by subtle and spontaneous structural changes; and the only substance that is disturbed widely enough, Water; also the only substance that is super-sensitive enough is also Water.

Thus, by way of spontaneous structural changes in Water Gimols, various kinds of extremely weak forces are influencing and controlling our Life Chemistry;

and thus, Water touched by different persons with different intentions, will have different psycho – physiological effects.

So, it will not be surprising if, in the near future, Science tells us to be careful before drinking Water and to check as to who, and with what intentions, was the last one to touch the glass. And also that, if we wish to nullify such influences, we should hold the glass with both our hands before drinking it. And that, if we wish to influence some one, then we should offer a glass of Water holding it in both of our hands with Commensurate Intentions and Commensurate Faith.

4: Science ancient times Wise have known that all Waters are not equal; and that they are different according to the different amount of “Prana” the Primordial – Energy, (the Prienergy) they contain.

Now Science too knows that all Waters are not equal even though they may be found equal as per all the chemical tests. Magnetically, Psychically, Spiritually and Pyramidally treated Waters are found to be different in Surface Tension, Cohesion, Adhesion, Viscosity, Conductivity, Water-drop form, Taste, many Psycho – Physiological effects and several Biological effects. The ordinarily observable changes being a drop spreading over a larger area, faster evaporation and no decay even on storing over a long period.

Though Science does not know in what way and by what kind of Prienergy, Science knows that by such treatment some changes in the Prienergy – Levels, the Primordial Energy Levels, have been effected. And Science suspects that such changes are brought by changing the Prienergy Levels of the two “H – atoms” in the Water Molecule; as it being already known that the “H – atoms” can be so changed to seven different Higher Energy Levels than the stable ground state; and that this can be ascertained by observing the Molecules under Electron – Microscopes and measuring the Apex – angles and the distance between the ‘H’ and the ‘O’ atoms.

5: Water is the most misbehaved chemical; a top most non – conformist. It breaks almost all the rules commonly followed by all other chemicals, and it outshines all other with prestine glory by these very uncommon behaviours. If it followed the rules it should boil at (-) 91°C . and freeze at (-) 100°C .; instead of it boils at (+) 100°C . And freezes at 0°C . These boiling and freezing points of Water are completely out of step with normal Chemical Theories (or else). Thus, if Water behaves as per the rules, then it cannot exist as liquid in normal conditions. So, it seems we are blessed by some unknown forces, some Prinergetic Forces or some Primordial Entity or some Divine Entity not yet known or understood by Science; and it keeps the Water in liquid state over a huge range of 100°C . instead of only 9°C ., (-91°C . to -100°C .), which it otherwise would have been, had Water been following the normal rules.

6: Also, instead of contracting when it is frozen, it expands; and as a solid, being lighter than the remaining liquid, it floats on top of it. Water freezes and becomes ice by forming crystalline structures of elongated Pyramid shape, the interiors of which are hollow. This is how the solid ice is lighter than the liquid Water.

Also, not only at temperatures below freezing point but even at normal temperatures, Water contains regions of short-lived Ice-crystals of microscopic size. Even in hot water such Ice-Crystals may be found; and the most astonishing thing about it is that such crystals form and melt away very fast; and it is suspected that such shuttling between solid and liquid state takes place millions of times every second.

Possibly, when greater is such shuttling in quantity and frequency that we find greater sparkle in Water, such as in fresh flowing Waters than in stagnant ones, such as magnetically or psychically treated Waters than in non- treated controlled ones; and this, certainly, must be on account of great or Prinerger Levels. Our Maharshies have known, since Ancient Times that not all Waters are equal and that they are different on account of different amount "Prana" in them.

7: In short, Water is the most dynamic and most non – conformist substance or there are most exceptional forces influencing it or, in other words, it has special blessings of the Divine Beings, it being selected being their Nectar. It is extremely sensitive to very weak Electromagnetic and Prinergetic influences. So, very weak cosmic influences of the distant planets and Galaxies, the so called Astrological influences, are capable of modifying the properties of Water; and by so influencing the Water in our Body (70% and Brain 80%) are able to exert great control over our very lives. Similarly, extremely weak Prinergetic forces, the called subtle forces or Psychic forces or the Mind forces, are able to influence our very lives through manipulations of the Water – Gimols in our Body and Brain.

Possibilities At Individual (Household) Level :

1: Experiments can be undertaken by any one with two kinds of Waters Pyramid Water and Magnet Water. Both objective as well as subjective experiments can be done. Millions of People, the World over, are doing such experiments with Pyramids and are getting several Physiological and other benefits. Mysterious Healing, Divine Revelations, Mummifying without decay, Charging Water with Healing Powers, Mysterious sharpening of Razor Blades, Initiations into Higher Concentrations, Bitter Foods losing Bitterness, Beverages going Flat, and so on and on.

Already, Hospital, School, Church, Office and Residential Buildings are being planed in Pyramid Shapes. Acres of farms are being covered with Pyramids made of wires. One Yoga Ashram near Pune is being planned with 200 huts of Pyramid

Shape for altering Consciousness while Meditating. Already there are over one million Pyramid Razor Blade Sharpners. In Europe some companies are selling Milk in Pyramid shaped containers, so that it retains freshness for 2 – 3 days even without refrigeration.

Over the past 20 years, thousands of Persons Hundreds of Organizations have tried to understand the nature and working of Pyramid Energy but have not been able to know anything except that there is some kind of strange Bio – Cosmic – Energy -- some kind of strange ENTITY which is different from any of the Energies already known to Modern Science.

Let us give it a try, for a Pyramid does work --- free of charge once it is constructed. It can save us time and money, and bring peace of mind and body. Soon after having experimented for a while with Pyramids, one all feel that,” Its rediscovery is the greatest thing that has happened to Humanity in this Century. “

2: The process of making this kind of Water is very simple. All that we need is to procure or to make a scale model of the Great Pyramid of Egypt and keep Water in the center and leave it there for 24 hours or one week or one month (referred to as P1 Water, P7 Water and P30 Water).

2-A: General Uses: We can use a glass full of P1 Water for drinking as soon as we get up in the morning, or few more times every day or we can even decide to drink only P1 Water through out the day. We can even get all our meals cooked with P1 Water. We can even use it for washing and bathing.

This has a miraculous rejuvenating effects onus. Our General Health improves to such an extent that, after 2 – 3 months, we find everyone surprised at the new youthful look; this has happened to even old people of over sixty. Also, we feel less tired and are able to do more work and with better efficiency.

2 -B: Specific Uses: We can use P7 Water or P30 Water for internal consumption (2-3 table spoonful) as medicine or for external applications as Ointment or Lotion or Balms for many minor specific problems – ours and that of our near ones – such as: Itching, Minor cuts, Burns and Bruises, Aches and Headaches and even Migraines, and all Psychosomatic Ailments such as Allergies Asthma etc.

3: Pyramids of any size can be made. All that is necessary, is to make them in the same proportions as the one in Egypt. Also they could be made of almost any material: Card board, Glass, Wood, Plastic, Cement – Concrete, Stoned, and even Metals. All give more or less the same results. It can be hollow from inside and also there could be holes in the sides or they can even be only frames of tubes making up 8 edges. The tubes again could be of any metal from Iron to Gold; or even any Plastics.

Details of the Pyramid:

A: Prepare 4 bilateral triangles in such a manner , that if “B” is the base of the triangle, then the lateral sides of triangle should be “0.95B”. Join the 4 triangles with help of any sticking material to prepare the Pyramid.

B: The where you place this Pyramid should be perfectly horizontal.

C: The square of the bottom should be parallel to the four directions i.e. , e.g. any one side of the bottom square should be in the North – South Direction.

D: As far as possible, the material to be kept in the Pyramid should be nearer Center Of Gravity of the Pyramid, as the concentration of the Cosmic Energy created in maximum there.

E: According to the experience the minimum period required for Mummification is believed to be about three weeks. Till then the Pyramid or the material kept for mummification should not be disturbed.

4: If we tryout for ourselves any one or more of the following objective experiments, it gives a great boost to our confidence in the potency of the Pyramids; resulting in greater and faster effects of P-Water in our own case.

I: Normally carcasses of any dead organism (insect, animal or bird) will start rotting , giving out foul smell. But, if we keep any dead animal or insect or bird, at the center of the Pyramid, it never start getting rotten and no foul smell ever comes out of it. And gradually over a period of 2 to 6 months, depending upon its size, it

gets dried up – it gets Mummified. Similarly, meats, eggs etc. get Mummified and dehydrated without getting spoilt.

II: Normally when flowers dry-up their colour fades and the petals fall off; but if they are kept in the Pyramids they remain their colour and they remain in the same form.

III: If we keep milk inside Pyramid, it never gets rotten and no foul smell starts coming out of it, instead it remains fresh for several days and then it gets converted into a nice Yogurt; and it tastes and feels fresh even after a month.

IV: Fruits kept inside a Pyramid, never get spoilt; instead they get dried-up a bit on the surface and even after few months they taste as fresh as ever.

V: If you keep your razor blades or knives inside the Pyramids, they get sharpened-up.

VI: Even old tarnished coins and jewellery get cleaned-up by the energy-forces working inside Pyramids; And many more ----- .

5: Even if we sleep or work or MEDITATE INSIDE A Pyramid, it helps a lot to get good sound sleep or do our work more efficiently or get some SPIRITUAL experience of higher levels of consciousness. Even children and pets like to work, study and play inside a Pyramid. As it doubles or triples the amplitude of alpha – Relaxation or Meditation Waves.

6: Reading some good books also gives a great boost to our confidence besides giving lot of information regarding various kinds of experiments done all over the World.

7: It will not be proper of us to dismiss all this as a bunch of LIES or a heap of GARBAGE without, we ourselves having tried it and found it to be wrong. It will certainly be unworthy of us the Indians! Also, it will be Anti – Scientificity to so

dismiss without proving it to be wrong by actual trials. Isn't it ?! So ! Let us go ahead with our own TRIALS ---- !!!!
